

TRINITY

GOLD STANDARD IN RECYCLING

Trinity Metals

Wade T. Conner
Co-Founder & C.E.O.

Trinity Metals Overview

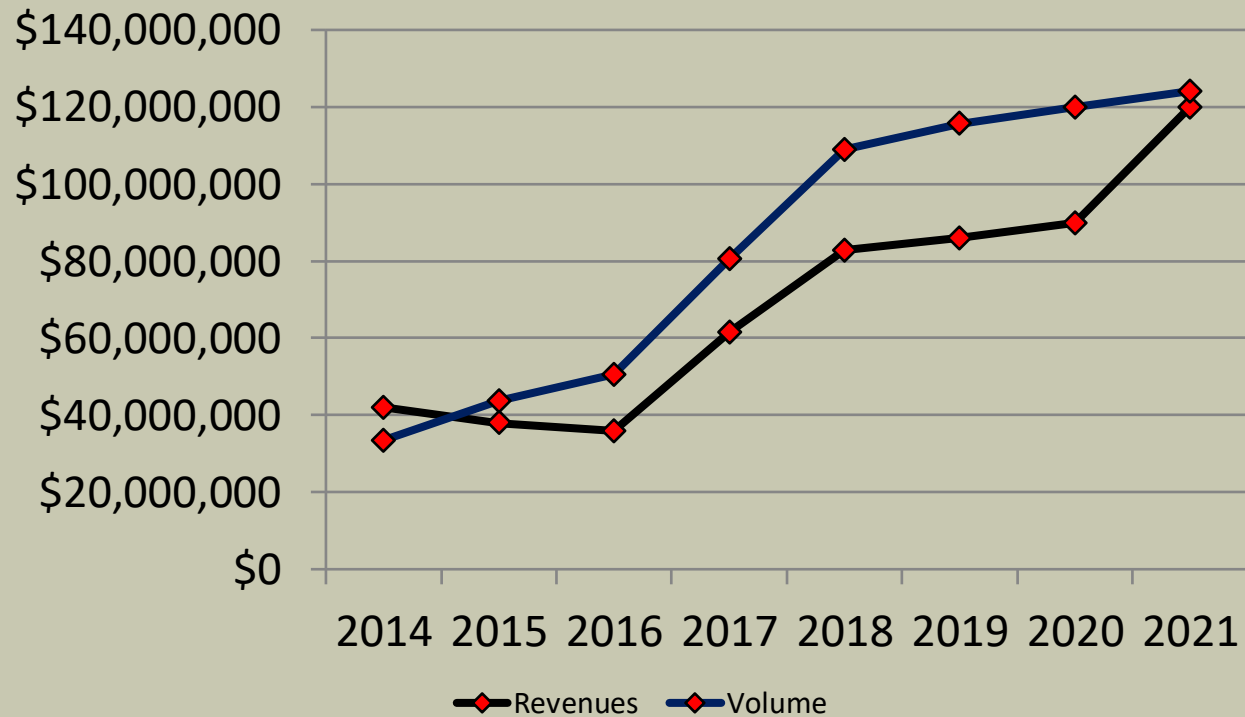

Trinity Metals is Made Up of Three Divisions:

- Non-Ferrous Metals – Processing, Wholesale and Trading
- E-Scrap Recycling – Processing and Component Re-Sale
- Foundry Additives – Processing, Packaging & Distribution

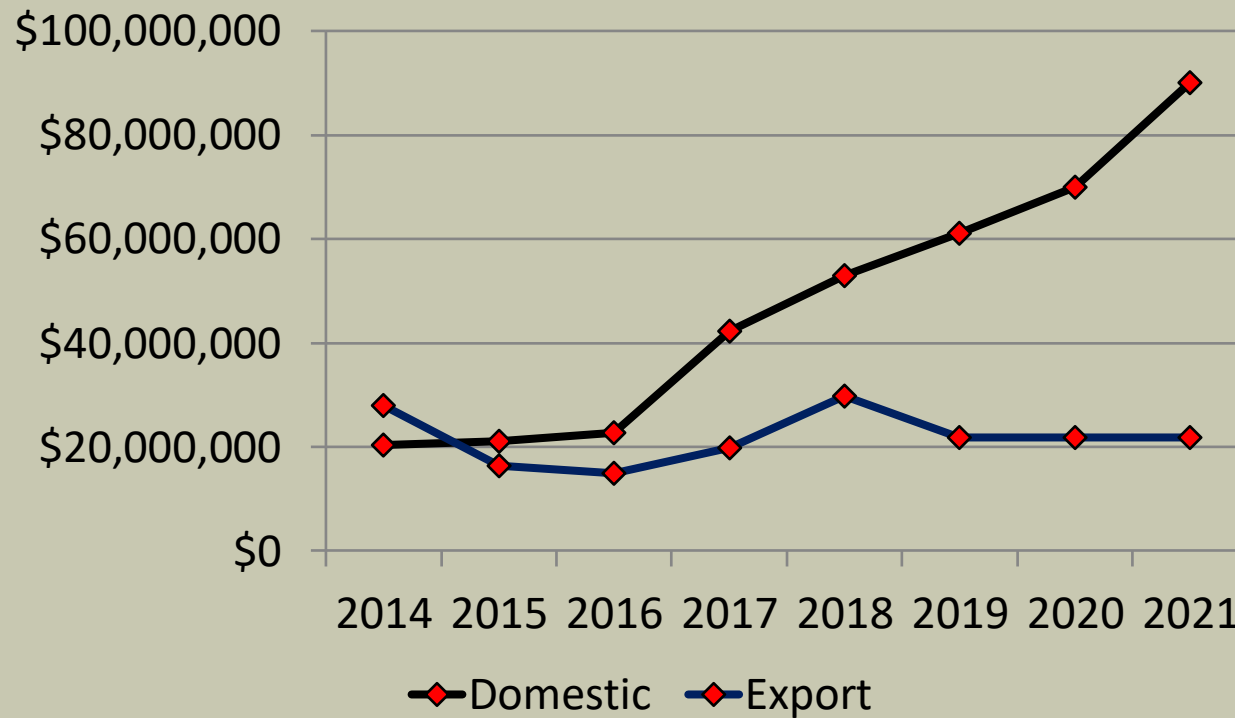

Our Team

Revenue and Volumes

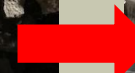

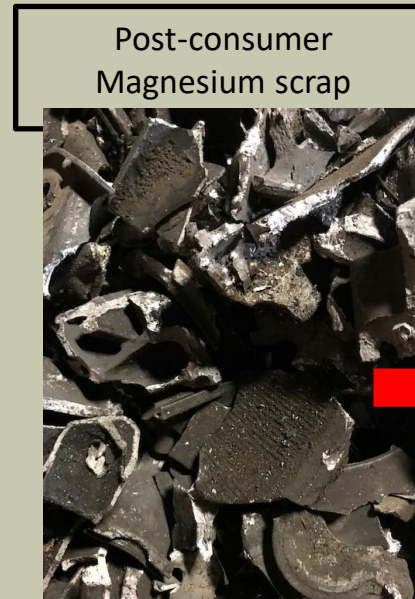

Domestic vs. Export

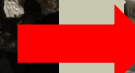

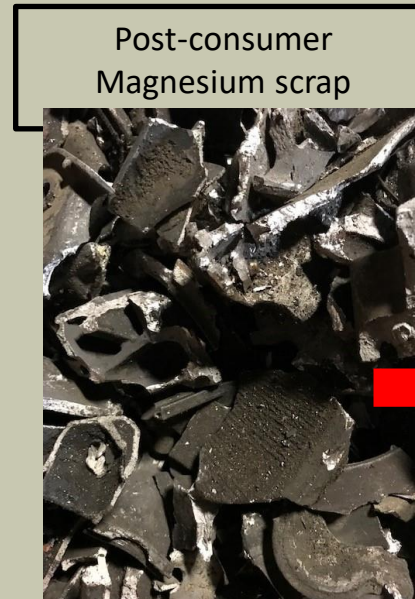

The Importance of Magnesium

- Magnesium is a critical metal for the following industries worldwide:
 - Alloying Aluminum
 - Die Casting
 - Anodes
 - Flares (both commercial and military)
 - Aerospace
- Magnesium is 1/3 Lighter than Aluminum
- China currently produces 90% of the worlds primary Magnesium
- Recycled Magnesium scrap is a cost effective substitute to primary magnesium.
- Magnesium scrap is VALUABLE COMMODITY -- Magnesium prices have doubled in 2021

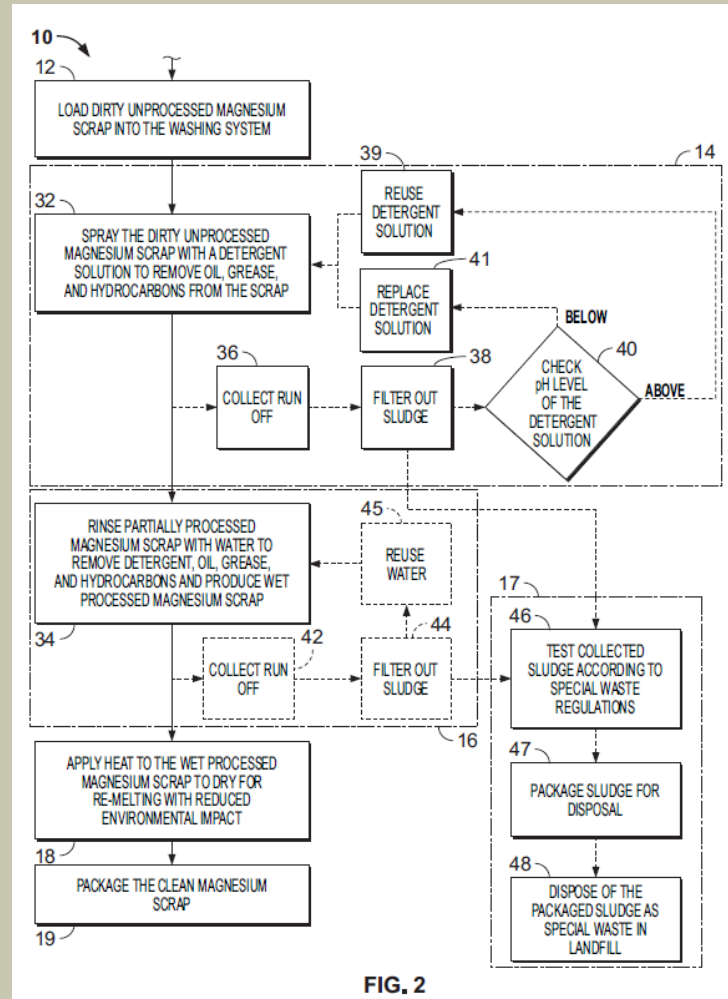

Why Clean Magnesium Scrap?

- Post-consumer Magnesium scrap may be covered in organic waste
 - Oil
 - Grease
 - Hydrocarbons
 - Other surface contaminants
- Re-melting some forms of Magnesium scrap “As Is” creates smoke that is hazardous to both people and the environment without expensive air pollution control systems
- Cleaning the Magnesium scrap prior to melting removes the organic waste which reduces the environmental impact of re-melting the scrap for reuse

Our Solution

- Shred, wash, rinse and dry Magnesium scrap in specially designed equipment that keeps the entire process contained
- Detergent solution and water may be filtered and reused in the process multiple times
- By-products may be tested and safely disposed of as special waste

Schematic of US Patent # 11,001,908

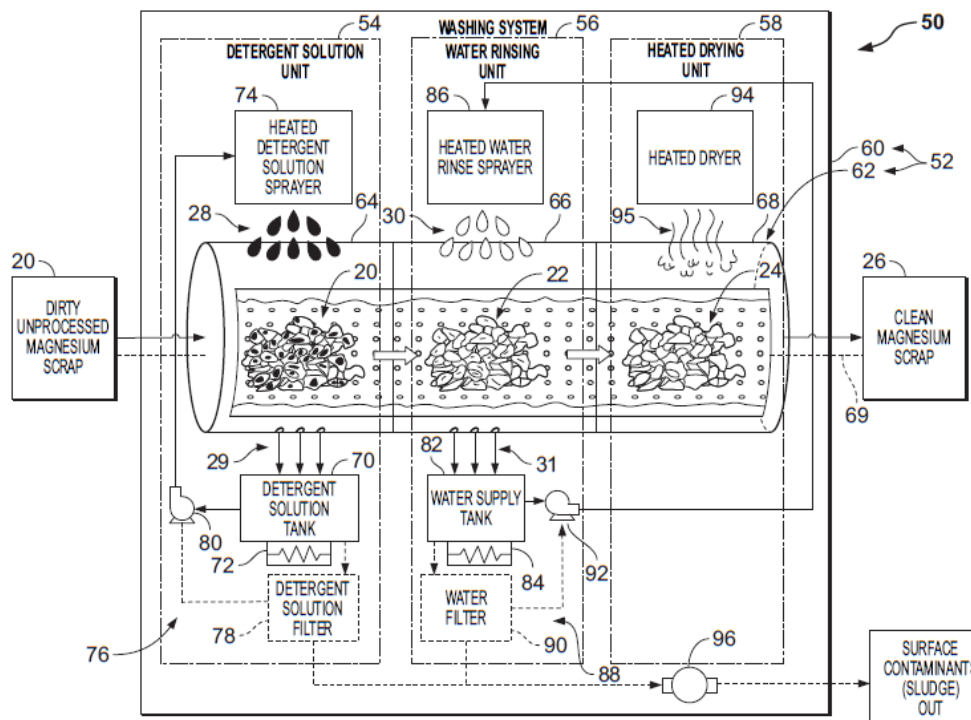

FIG. 1

The Final Product

Clean Magnesium Scrap

Our Products

- Our final product is Magnesium Scrap that is bright and shiny and free of oil, paint & iron
- Our final product be used directly as a melt additive either by an Aluminum Mill or a Secondary Remelter of Magnesium Scrap
- Our products are available in multiple forms of packaging
- Our products are approved for consumers across the USA as well as in Canada, Brazil, South Korea and the European Union

Special Thanks

- Sam Geisting & Jessica Kiser from Barnes & Thornberg

- Mark Shublak & Frank Deveau from Taft Law

- Jennifer Collins, Julia Wickard & Cameron Maschino & the CTAP Inspection Team from IDEM

Our Motivation

What do you work for?

“I am nothing more than the sum total of the experience, energy, wealth and self sacrifice invested in me by my family and ancestors. All I have done is take advantage of the advantages given to me.”

“I am limited only by my lack of self discipline and willingness to apply myself.”
